

## Get Centered

Today's home theater systems are intended to give you a realistic perspective when listening to movies, music and sporting events. But that's no easy feat. To get sound that truly blows your mind - with power and impact to match the moving image - you need midrange that's precisely articulated.

With that in mind, Proficient Audio has designed a high-performance, flagship center channel speaker that delivers lifelike sound. And, when you're sitting off-axis - out of the "sweet spot" listening area - the CC550 provides ultra-wide horizontal dispersion for superior tracking with your video screen.

The CC550 is truly a high-end system and features two 5¼" Kevlar woofers that deliver tight, low-end bass. Our twin 2" bass ports help to deliver deeper bass while reducing vent noise and distortion. And with a 3" Kevlar midrange driver, dialog is clear and precise. To top it off, the 1" aluminum dome tweeter gives you smooth, flat response on the high-end of the frequency range. All of this - optimized within a low-resonance cabinet.

The CC550 and CC525 center channel speakers are built using some of the best components available and is backed with our 10-year limited warranty, ensuring years of trouble-free enjoyment.

That's quality you can trust. Exactly what you'd expect from a premium brand like Proficient.
