

## Super-Tuners Unleashed!

Audio engineers can do amazing things, as you'll find in our flagship line of Kevlar speakers. Our Super-Tuners have taken a material that's incredibly strong yet responsive and created speakers that perform on an entirely new level. When you experience the power and realism as it fills the room, you'll know how great a speaker can be.

Start with the C850 ceiling speaker. It gives you an 8" Kevlar woofer, a 1" aluminum dome pivoting tweeter suspended in our renowned X-Mount tweeter bridge, bass and treble contour switches, and 175 watts of pure cranking power. Then there's the C645, with a 6½" woofer. A touch more compact, but with 150 watts it'll rock your world in a serious way.

Thinking of walls? Go with the W850. Featuring an 8" Kevlar woofer and 1" aluminum dome tweeter, it'll bring the biggest room to life. Or, choose the W690 with a 6½" woofer, 1" tweeter and 150 watts. Now even the most familiar CD will sound like you're hearing it for the first time.

It's a challenge to create. But we think you'll agree the Super-Tuners at Proficient have succeeded.

Quality-built, of course. Exactly what you'd expect from a premium brand like Proficient.
