

PROFICIENT™
C1030

Bad To The Bone

Introducing the Proficient C1030, the most powerful LCR ceiling speaker ever made. It's truly one-of-a-kind. Every C1030 boasts the unrelenting brute force that larger theater rooms and ultra high-end cinema systems demand and deserve.

For starters, it's a 3-way system with a 10" Kevlar® woofer in a cast magnesium basket, 3" pivoting Kevlar midrange and 1" pivoting aluminum tweeter. With 200 watts of power handling, it's truly proof positive of our claim.

Have Fun Listening

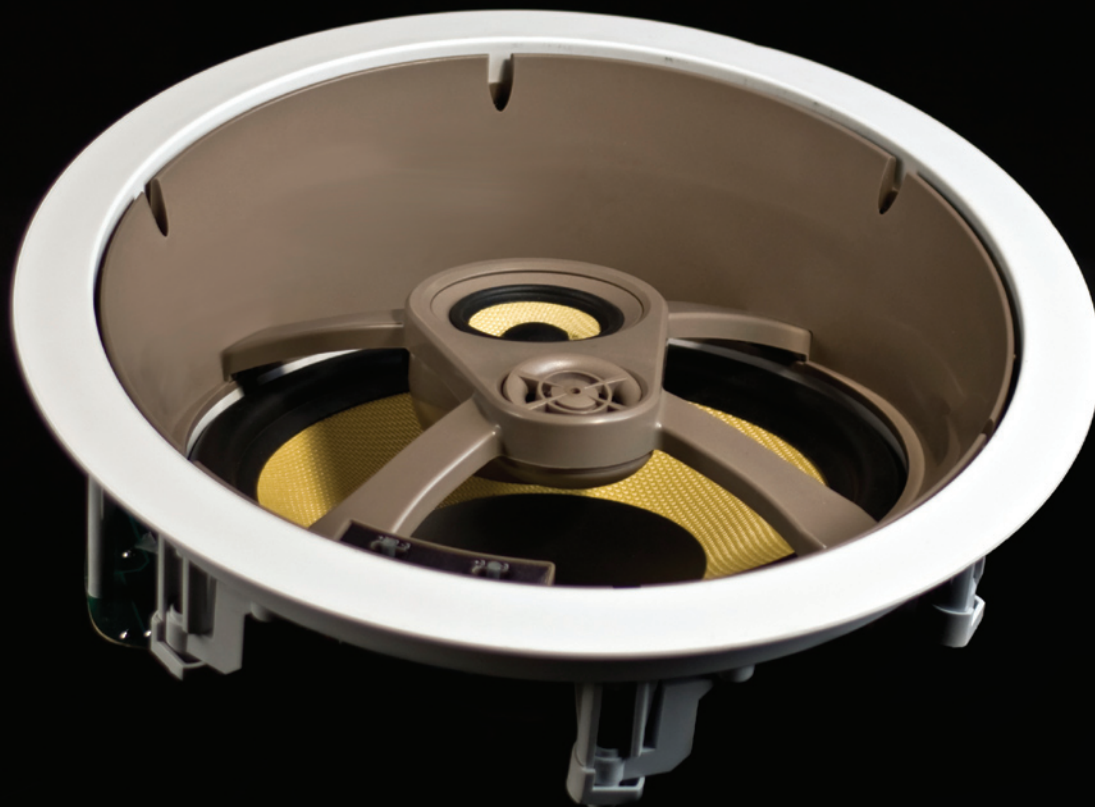

But, a great ceiling speaker is about more than just SPL — it's also about clarity. And it is this ability to reproduce every detail of the sound, regardless of where you're sitting, that makes the C1030 truly unique.

So, when your dream home deserves the ultimate cinema system, build it with the speakers that will let you live that dream for years to come.

The Proficient C1030. Quality-built, of course. Exactly what you'd expect from Proficient.

C1030 Features

10" 3-Way LCR Ceiling Speaker

Application:	7.1 Home Cinema Systems
Woofer:	10" Kevlar Cone
Midrange:	3" Pivoting Kevlar Cone
Tweeter:	1" Pivoting Aluminum Dome
Contour Switches:	±3dB Midrange & Treble
Power Handling:	200 watts
Frequency Response:	40Hz - 22kHz
Impedance:	4Ω
Sensitivity:	92dB 1W/1m
Dimensions:	Diameter 13 ³ / ₈ " x Depth 7 ⁵ / ₈ "
Ceiling Cut Out:	11 ⁷ / ₈ "
Weight:	14 ¹ / ₄ lbs
Mounting Bracket:	PCB-C1000 included
Unit of Measure:	Each
Warranty:	10-Year Limited

PCB-C1000 Bracket

Required Pre-Construction/Retrofit Bracket

- Required for all installations of C1030
- For new construction and retrofit installations
- Heavy-duty steel bracket with intelligent folding design facilitates mounting through the speaker cut out in existing construction
- PCB-C1000 is included with the C1030
- PCB-C1000 is available separately
- Support rails align with the bottom of the ceiling joists. Tabs above the rails are for secure screwing of the bracket to the building structure
